

Aide Solar Expands Global Sales and Distribution Network to Europe, Broadening Local Customer Service Capabilities

Global producer of PV modules partners with Hikari Solar to establish European headquarters in Madrid and a gateway to Latin America, Africa and the Middle East

MUNICH, Intersolar Europe, – June 7, 2011 — Continuing its global expansion, [Aide Solar](http://www.aidesolar.com) (www.aidesolar.com), a large-scale producer of photovoltaic modules headquartered in [Xuzhou, China](#) and a subsidiary of [The Panjit Group](#), today announced a sales and distribution partnership with [Hikari Solar](#) in Europe with regional headquarters in Madrid, Spain and sales offices in Madrid, Bari, Italy and Munich, Germany.

Hikari Solar provides integrated efficient energy solutions, renewable energy products and services and focuses on satisfying its customer needs along the entire life cycle of its projects. As the newly authorized partner in Europe, Latin America, Africa and the Middle East for Panjit Group and its subsidiary Aide Solar, Hikari Solar will contribute to global operations with its unique sales penetration capacity and high value services ranging from pre-sales to legal advice, technical training, after-sales service and customer support.

“By establishing our European headquarters in Spain through our partnership with Hikari Solar, we are also addressing large markets like Latin America, Africa and the Middle East where we are expecting to see healthy growth,” said Eddy Fang, director of World Sales and Marketing, Aide Solar. “Forging stronger customer relationships and enhancing our ability to respond to customer needs globally is our highest priority.”

“We are proud to be a strategic partner with the Panjit Group and Aide Solar,” said José Cánovas of Hikari Solar. “We see the partnership as a competitive advantage for our own business, not only because of Panjit Group’s global presence and its experienced team, but also because of the high quality, efficiency and reliability of its products and services, which are the best guarantee for our customers.”

Aide Solar’s innovative portfolio of integrated efficient energy solutions combining wind power turbines, LED lamps, storage batteries, charge controllers and solar modules ranging from 185W to 305W, will be on display in Booth A4.110 at [Intersolar Europe](#), the world’s largest solar exhibition, June 8-10 in Munich, Germany.

“The future of photovoltaics remains very healthy in Europe,” said Arnaud Duteil, technology market analyst, [Yole Development](#). “Cumulative installed capacity of PV systems is likely to reach 100 GW by 2015, an increase of over 233 percent from 2010.”

The Aide Solar production facility in Xuzhou, China produces a combine 800 MW of mono and poly modules to support current customer demands worldwide. Aide Solar broke ground in January of this year at the 242 hectare (600 acre) Xuzhou campus for an 88,000 m² production facility capable of housing up to 2GW of module capacity under a single roof to further expand capacity. In 2009 [Aide Solar established](#) a North America headquarters in Tempe, Arizona, to address the growth projections of solar products in the U.S. market.
