

## **Aide Solar Modules Receive MCS Accreditation Opening the Door to Photovoltaic Systems Benefiting from United Kingdom's Feed-in Tariff**

*MCS is a requirement of the British government to design, supply, install and commission photovoltaic systems in the UK*

**TEMPE, Ariz., and XUZHOU CITY, China – July 30, 2011** — [Aide Solar](http://www.aidesolar.com/) (<http://www.aidesolar.com/>), a large-scale producer of photovoltaic modules and a subsidiary of the [Panjit Group](#), today announced that its photovoltaic (PV) Modules have received accreditation under United Kingdom's (UK) Microgeneration Certification Scheme (MCS). Obtaining MCS is a requirement of the British government in order to supply solar photovoltaic systems in the UK. This important milestone opens the door for Aide Solar to use its modules in systems that benefit from the UK's Feed-in Tariff.

“Our extensive range of mono- and polycrystalline high-performance modules are used worldwide,” said Eddy Fang, director of Worldwide Sales and Marketing, Aide Solar. “This important accreditation combined with the recent opening of our European headquarters in Spain in partnership with [Hikari Solar](#), positions us well to continue to grow our market share.”

The MCS accreditation is an internationally recognized quality-assurance scheme that validates the quality and reliability of approved products that satisfy rigorous standards. Product certification involves type testing of products and an assessment of the manufacturing processes, materials, procedures and staff training.

### **About Aide Solar**

Aide Solar is a large-scale producer of photovoltaic modules based in Xuzhou City, China with North American headquarters in Tempe, Arizona. Aide Solar was established in 2003 and became a subsidiary of the Taiwan-based Panjit Group in 2007. Ranked as one of China's leading solar panel manufacturing companies with customers worldwide, Aide Solar is committed to technology innovation and providing the best customer experience in the industry. To learn more about Aide Solar, please visit <http://www.aidesolar.com> or call 480-388-3226. You are also invited to follow Aide Solar on [Twitter](#) or [Facebook](#).

### **About Hikari Solar**

Hikari Solar provides integrated efficient energy solutions and renewable energy products and services combining solar PV, wind power generation, storage batteries, LED lamps and charge controllers. The company is focused on satisfying its customer's needs, supporting them along the whole life cycle of their projects. Hikari Solar is the authorized partner in Europe, Latin America, Africa and the Middle East of global and leading industrial Panjit Group, a 25 year experience organization in the renewable and semiconductor industries. For more information about Hikari Solar please visit [www.hikari-solar.com](http://www.hikari-solar.com).
