Aide Solar Establishes U.S. Headquarters in Arizona

Company becomes first Chinese solar panel manufacturer to open six thousand square feet of warehouse and office space in Arizona, gaining U.S. customer service advantage

TEMPE, Ariz., – June 22, 2009 — [Aide Solar](#), a large-scale producer of photovoltaic solar cells and modules, today announced the opening of a 6,300 square foot warehouse and office space in Tempe, Arizona. Headquartered in Xuzhou City, China, and a subsidiary of [The Panjit Group](#), Aide Solar is one of China’s leading solar panel manufacturing companies and currently serves customers worldwide. With plans for expansion that include assembly and test capabilities at its Tempe facilities, Aide Solar is committed to offering solar integrators, installers, and original equipment manufacturers an unparalleled level of flexibility and service, resulting in the best customer experience in the industry.

“By expanding its operations to the U.S., Aide Solar is gaining a customer-service advantage in satisfying the accelerating demand for sustainable, renewable energy sources,” said Steve Zylstra, president & CEO, [Arizona Technology Council](#). “With its strong technology-base, natural abundance of sunshine and wide range of support from government and civic groups, Arizona is well-suited to serve as Aide Solar’s U.S. headquarters and we welcome them as an addition to the community.”

Aide Solar’s local inventory of quality and affordable solar modules is a benefit to its customers seeking a reliable and flexible source for commercial, residential, and utility scale projects. As a subsidiary of The Panjit Group, Aide Solar is well-positioned to continue technology innovation and new product development and offering complete solar solutions. The Panjit Group’s Tempe-based semiconductor manufacturing facilities established in 2002 offers Aide Solar a future path for a vertically integrated U.S. business model.

“Establishing a U.S. headquarters is an important milestone in Aide Solar’s history and we are very excited about the potential opportunities here which fuel our plans for continued growth and expansion,” said [Raymond C. Wiley](#), Director, North America Sales, Aide Solar, U.S.A. “We have seen a tremendous commitment in Arizona to the solar industry and applaud the state’s leaders who share our dedication to promoting solar as a viable alternative energy solutions.”

About Aide Solar

Aide Solar is a large-scale producer of photovoltaic cells and modules with U.S. headquarters in Tempe, Arizona. Based in Xuzhou City, China, Aide Solar was established in 2003 and became a subsidiary of the Taiwan-based Panjit Group in 2007. Ranked as one of China's leading solar panel manufacturing companies with customers worldwide, Aide Solar is committed to technology innovation and providing the best customer experience in the industry.
